

Patient file record

⚙ Status	In progress
👤 Assign	Ⓜ Mennah Allah

1- Patient Basic Information

- Patient Name
- Medical Record Number (MRN)
- Admission Date / Time
- Discharge Date / Time
- Doctor Name / Signature
- Department / Unit

2- Admission & Discharge Summary

- Age / Gender / Marital Status / Occupation
- Patient Address / Phone Number
- Employer / Insurance Information
- Reason for Admission / Initial Diagnosis

- Date and Time (Admission / Discharge)
- Length of Stay
- Final Diagnosis + ICD Code
- Associated (Comorbid) Diagnoses
- Operations / Procedures Performed
- Condition at Discharge (Improved / Stable / Deceased)
- Discharge Recommendations (Discharge to Home / Transfer to Another Hospital / etc.)

3- Personal History

- Age / Gender / Marital Status / Occupation
- Children / Personal Habits (Smoking / Coffee / Alcohol)
- Allergies
- Previous Drug Reactions
- Presenting Complaint(s)
- Past Medical History (Previous Admissions & Surgeries)
- Family History
- Psychosocial History
- Review of Systems (General, Pain, Respiratory, Cardiovascular, etc.)
- Current Medications Before Admission

4- Patient Internal Transport Safety Form

Internal transport refers to the transfer of a patient from one department to another within the same hospital (e.g., from the Emergency Department to Radiology, ICU, Operating Room, or another inpatient unit).

- Continuous Monitoring Form

- Staff / Accompanying Personnel
- Transport Method
- Risk Level
- Risk Score for Transport Patient (RSTP)

Clinical Status:

- Hemodynamic Status (Stable / Moderately Stable / Unstable)
- Arrhythmias
- ECG Monitoring
- Intravenous Line
- Provisional Pacemaker

Respiratory Status:

- Respiratory Rate
- Airway (Guedel airway / Intubation / Tracheostomy)
- Respiratory Support (Oxygen / Mechanical Ventilation)

Neurological Status:

- Glasgow Coma Scale (GCS)
- Prematurity (if applicable)

Supportive Therapy:

- Technopharmacological Support (e.g., Inotropes, Vasodilators, etc.)

5- Daily Antibiotics Follow-up

- Sample Type
- Culture Result
- Collection Date
- Indication / Reason for Use

- Dose / Route / Duration
- Clinical Pharmacy Notes
- Doctor and Pharmacist Signature

6- Medication Prescription & Administration

- Drug Name
- Dose
- Number of Days
- Day
- Route of Administration
- Frequency
- Administration Instructions
- Physician and Clinical Pharmacist Signature
- Record of Discontinued or Refused Medications (Refused / Not Available Medications)

7- Multidisciplinary Care Plan

- Problem List / Medical Conditions
- Allergies / Interventions
- Desired Outcomes
- Time Frame
- Physician Plan & Signature

8- Recommended Nutrition / Nutritional Care Plan

Patient Information

- Patient Name / MRN
- Age / Gender
- Weight / Height / BMI
- Diagnosis
- Admission Date / Department
- Dietitian Name

Nutrition Assessment

- Anthropometric Data (Weight loss, MUAC, etc.)
- Biochemical Data (Albumin, Hb, Electrolytes, Glucose)
- Clinical Signs of Malnutrition
- Dietary History
- Food Preferences / Allergies / Intolerances

Nutritional Requirements

- Calories (kcal/day)
- Protein (g/day or g/kg)
- Fluids (ml/day)
- Macronutrients (Carbs / Fat / Protein balance)
- Micronutrients (Vitamins / Minerals)

Diet Prescription

- Normal / Soft / Liquid Diet
- Diabetic / Cardiac / Renal Diet
- High Protein / High Calorie Diet
- Sodium / Sugar / Fat Restrictions

- Enteral Nutrition (Tube Feeding Type & Rate)
- Parenteral Nutrition (TPN if needed)
- Oral Nutritional Supplements (ONS)

Nutrition Care Plan

- Nutrition Diagnosis
- Goals (Weight gain, glycemic control, healing support)
- Interventions (Diet modification, counseling, supplements)
- Monitoring Plan (Daily / Weekly reassessment)
- Discharge Nutrition Instructions

9- Venous Thromboembolism (VTE) Risk Assessment – Padua Score

Risk Factors

- Active Cancer
- Previous VTE
- Reduced Mobility
- Recent Surgery / Trauma
- Thrombophilia
- Age $\geq$ 70 years
- Heart / Respiratory Failure
- Acute Infection / Rheumatologic Disease
- Obesity (if applicable)
- Hormonal Therapy

Scoring

- Total Padua Risk Score

Assessment Result

- Low Risk / High Risk for VTE

Prophylaxis Recommendation

- Pharmacological Prophylaxis (e.g., anticoagulants)
- Mechanical Prophylaxis (e.g., compression stockings / IPC devices)
- No prophylaxis required (if low risk)

10. Doctor's Orders

- Date & Time
- Medication Orders
- Laboratory Orders
- Imaging Orders
- Nursing Instructions
- Monitoring Instructions (Vitals / ICU parameters)
- Diet Orders
- Activity Level (Bed rest / Ambulation / etc.)
- Procedures Requested
- Physician Signature
- Order Status (Active / Completed / Modified / Cancelled)

11. Consultation Request

Consultation Type

- Emergency

- Urgent
- Routine

Clinical Information

- Reason for Consultation
- Brief Medical History
- Current Diagnosis
- Current Condition

Requested Investigations

- Laboratory Tests
- Imaging Studies (X-ray / CT / MRI / Ultrasound)
- Special Procedures (if needed)

Consultation Details

- Specialty Requested (Cardiology / Surgery / Neurology / etc.)
- Specific Question for Consultant

Signatures

- Referring Physician Signature
- Consultant Signature
- Date & Time
